```java
void GuessStatistics (char candidate, int count)
{
        String number;String verb;String pluralModifier;
if(count == 0){
number = "no";
verb = "are";
pluralModifier = "s";
}else if(count == 1){
number = "1";
verb = "is";
pluralModifier = "";
}else{
number = Integer.toString(count);
verb = "are";
pluralModifier = "s";
}
String guessMessage = String.format("There %s %s
%s", verb, number, candidate, pluralModifier);
print(guessMessage);
}
```
